

Business Model - Clique App

About Clique

Main idea: An all in one family and friend social networking app

- ★ Authenticity, privacy, interactivity, and convenience
- ★ Simplifying communication for families and friends
- ★ Enhancing and strengthening authentic connections especially in long-distance relationship
- ★ Reducing screen time without losing connection
- ★ An affordable, highly interactive, and modernized version of BeReal designed to help families and close networks stay connected in real time.
- ★ turn moments into memories with one click
- ★ Cuter interface
- ★ Next steps: develop a website
- ★ Get customer validation
 - <https://forms.office.com/r/AHEHv2P3uj> - under yingzhen1326@gmail.com
- ★ Canva mini prototype
 - https://www.canva.com/design/DAGfBRbAOfE/KrTDmg8oz8GWt1oz1gsfNQ/edit?utm_content=DAGfBRbAOfE&utm_campaign=designshare&utm_medium=link2&utm_source=sharebutton

Service	Best Model	Live Mode	Recording	Web Access	Generates Images	Generates Code	Data Analysis	Text-to-Speech	Speech-to-Text	Personality	Supersense
OpenAI ChatGPT	GPT-4o	✓ Full multimodal	✓	✓	✓ DALL-E3	✓	✓	✓	✓	Polished and efficient in tone. In-line models. Repetitive and adaptive.	Live mode, most versatile set of features and capabilities.
Google Gemini	Gemini 1.5	✓ Full multimodal	✓	✓	✓ DALL-E3	✓	✓	✓	✓	Methodical and analytical.	Very powerful model for complex reasoning tasks, particularly in science, coding, and mathematics.
Microsoft Copilot	Copilot	Voice only	✓	✓	✓ DALL-E3	Limited	✓	✓	✓	Since it uses different models behind the scenes, a little inconsistent.	Works well with Microsoft products and services.
Anthropic Claude	Claude 3.5	✓ Full multimodal	✓	✓	✓ DALL-E3	Limited	✓	✓	✓	Clean and friendly.	Great for more creative and socially engaging model.
Google Gemini	Gemini 1.5	Voice only	✓	✓	✓ Imagen 3	Limited	✓	✓	✓	Helpful and structured.	With a range of features, good connections with search.
Meta Llama	Llama 3.3	✓ Full multimodal	✓	✓	✓ Llama 3.3	✓	✓	✓	✓	Generative and helpful.	Powerful model integrated tightly with L.
DeepSeek	DeepSeek v3	✓ Full multimodal	✓	✓	✓ DALL-E3	✓	✓	✓	✓	Neuroscally helpful, warm.	Powerful model integrated tightly with L.

Idea: have a setting in the app that lets the user “go off the grid” when their social battery is up so they don’t feel obligated to have things shared with friends

TO DO as of 4/9/2025

1. Sign-Up Flow - use more white

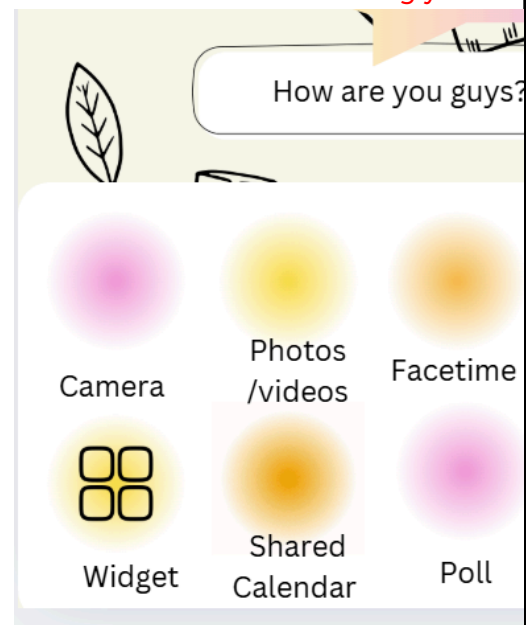

- ☒ ~~Redirect to home screen after successful sign-up~~
- ☐ Store entered username and make it accessible globally
- ☐ Display username in user profile screen
- ☐ Allow profile picture upload during sign-up
- ☐ Store uploaded profile picture and make it accessible for user profile and messages
- ☐ When you hit Sign up, and after you input your username, in the "Let's learn more about you screen" hitting "Skip" doesn't do anything (it needs to route to home)
- ☐ possibly remove redundant Log In button , instead have it pop up after username and password are authenticated
- ☐ change the "add a profile photo" screen, the x _ _ _ _ is nice but it could be better and more intuitive??
- ☐ need to add a back button to welcome, @username!!
 - ☐ maybe make this a swipe feature, where it automatically goes to the welcome screen after sign up, then you can swipe to the lets learn more about you screen, and some animated background stuff that move when you swipe.
- ☐ Change

2. Recent Memory Display on Home

- ☒ ~~Increase height of the memory preview section on the home screen~~

4. Master Calendar MVP

- ☐ Can we at least add the facetime, call, calendar, events reminder, and poll icons in the group chat tool bar so we can show those functions will be in each group chat as well? → doesn't have to be functioning yet

- ☐ Have calendar send an automated notification reminder before the event starts
- ☐ Have events reminder tool available as a home screen widget
- ☒ Implement calendar UI (calendar/master.tsx)
- ☐ Display dates with group photo icons or frame indicators
- ☐ On date press, display scheduled events for that day

- ☒ ~~Display one memory statically for now in that section~~
- ☒ ~~Prepare to dynamically pull posted memories later~~
- ☐ add more frames and picture examples show on the inside
- ☐

3. Memory Feature Implementation

- ☐ Each group chat setting has the option to add posted memories to a dedicated home screen widget for that specific group
 - ☐ If this function is turned on, they have more setting options including:
 - ☐ Setting the time and frequency per week to get a notification reminder of when to post a memory (ex. Get reminders 4pm every other day)
 - ☐ Have default setting —> which means they just post whenever they want
 - ☐ Add different frames and stickers for the camera ?? (not priority tho)
- ☐ Enable a message box underneath the posted memories for people to respond or react to
- ☐ Complete camera screen (memory/camera.tsx)
- ☐ Add sticker support (use local assets only)
- ☐ Add frame selection and apply selected frame to photo
- ☐ Display confirmation screen with posted memory
- ☐ Store posted memory locally and display it in recent memory section
- ☐ rework the ui remove the main random button
- ☐ Pinned polaroid icon for bottom 3 nav bar

- ☒ Prepare filter support by group or occasion type
- ☒ Prepare multiple calendar views: week, day, month
- ☒ Ensure support for specific time input when scheduling

5. User Profile Feature

- ☐ Display saved user data: username, avatar, bio
- ☐ Wrap avatar image with selected frame
- ☐ Add QR code generation for user profile (placeholder)
- ☐ Add optional phone number field
- ☐ Display password in settings as a masked field (*****)
- ☒ ~~Store all user profile data locally for now~~

6. Assets and UI Support

- ☒ Upload all necessary Google Material icons
- ☒ Upload and apply required fonts
- ☒ Add support for one custom font
- ☒ Fix logo font and size across all screens

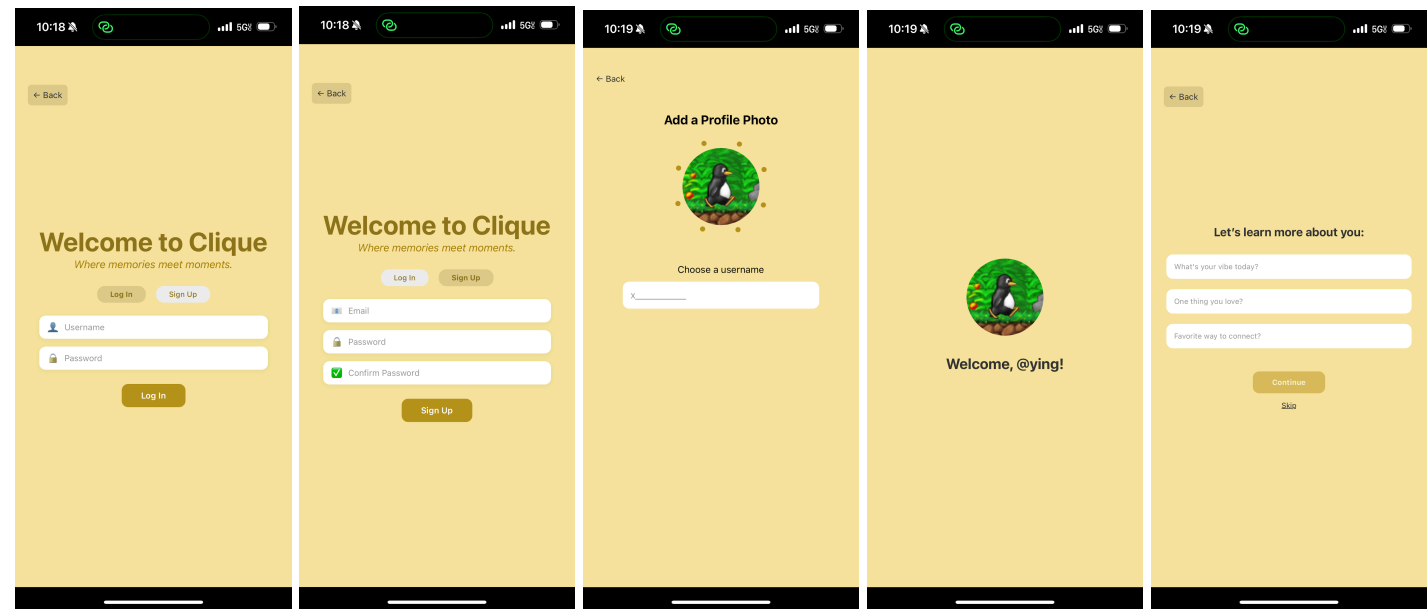

7. Add Friends Feature

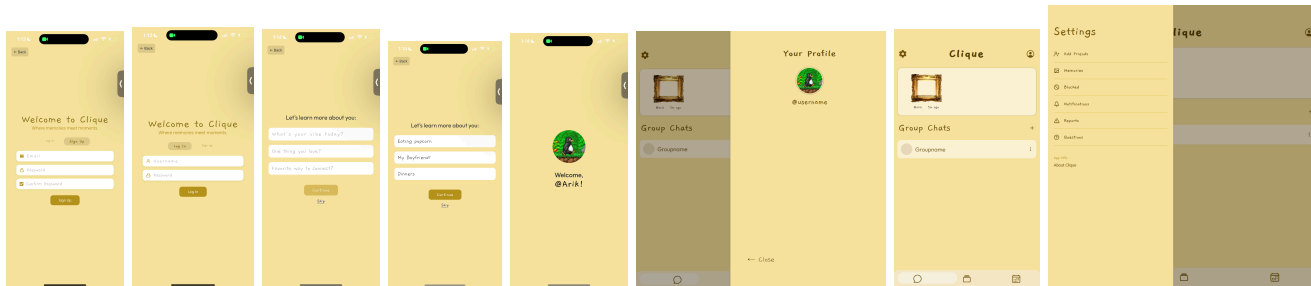

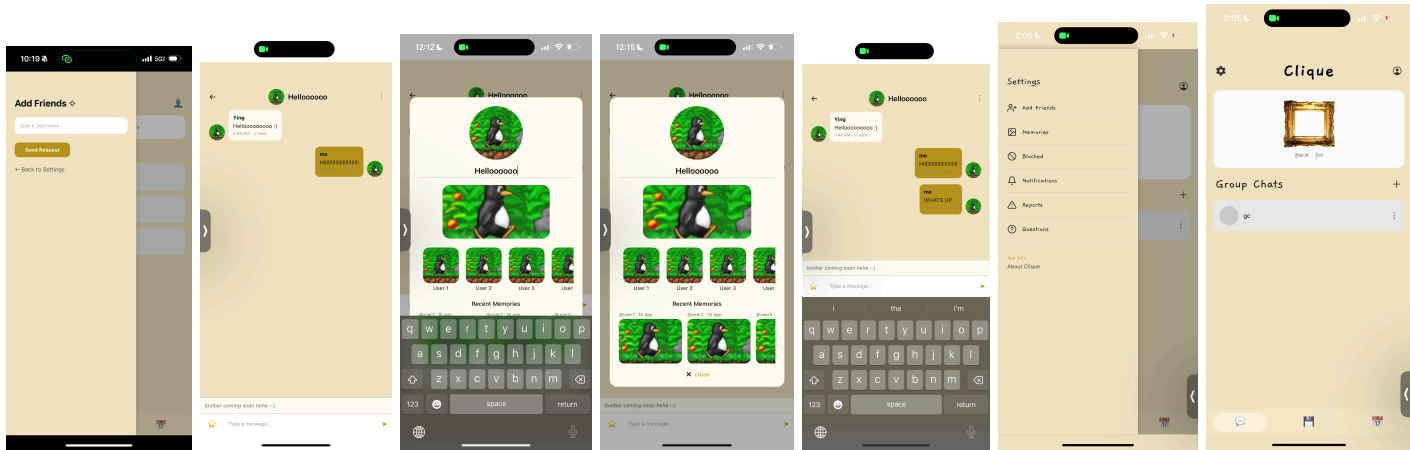

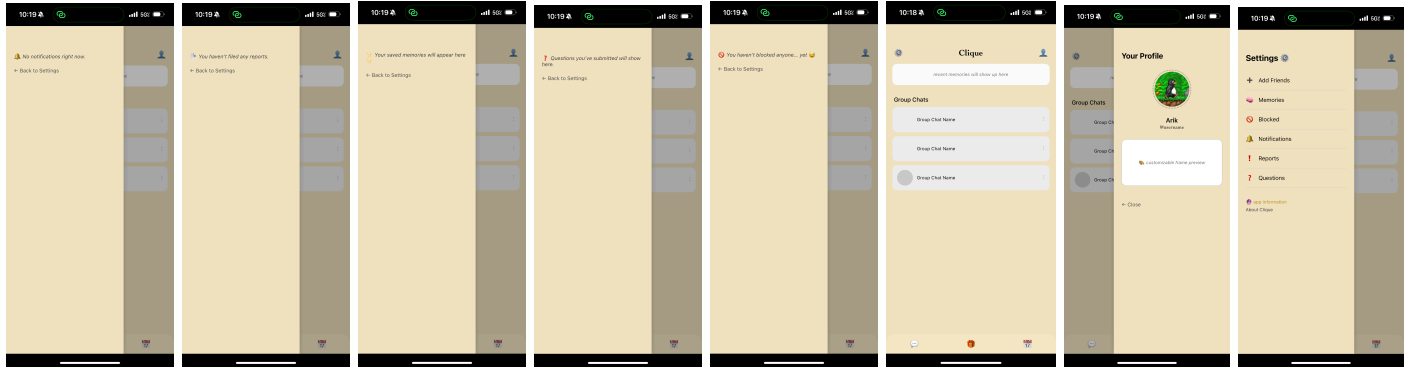

- ☒ Implement add friend logic from settings sidebar
- ☒ Store added usernames in local list
- ☐ Prepare UI to display friend list in profile or sidebar

8. Things to look into:

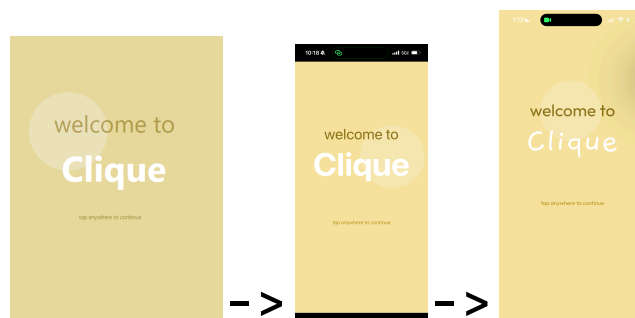

- ☐ **Fediverse**
 - ☐ <https://en.wikipedia.org/wiki/Fediverse>

UI Progression

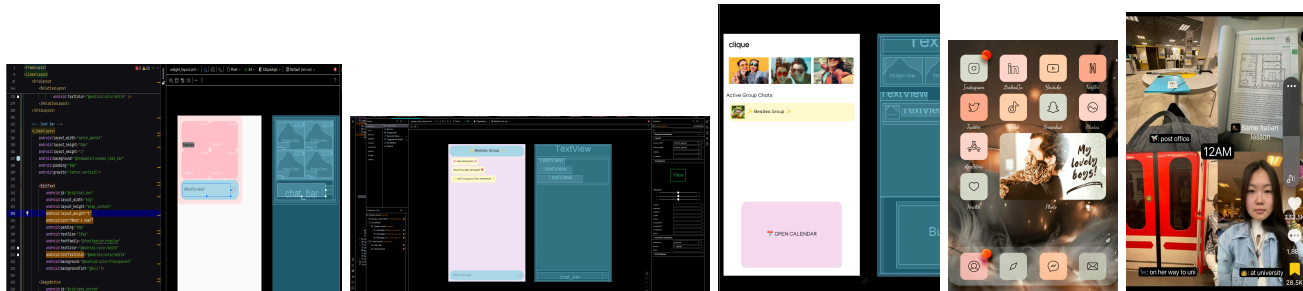

Welcome Screen Progression

Our First Prototype

Value Proposition

- ★ What value do we deliver?
- ★ Which one of our customer's problems are we helping to solve?
- ★ What bundles of products and services are we offering to each customer segment?
- ★ Which customer needs are we satisfying?
- ★ An affordable, highly interactive, and modernized version of BeReal designed to help families and close networks stay connected in real time.
 - link digital calendar and have it anonymous
 - get rid of step tracker
 - proper marketing and everybody doesn't like subscriptions and catering to market, with reasonable price bc of preventing doom scrolling
 - subscription is being transparent for social media app for wellness (healthy digital social media app)---> inverted
- ---> in order to be sustainable
- get rid of ads
- instagram
- do odd pricing
- just bringing
- chat gpt to write marketing plan
- rly good story telling and paid ads
- can see friends and not add apps
- strong social strategy ---> real content (reels and story)
- ★ cloud campaign ---> marketing agency
- ★ oregon venture fund ---> reach out to get funding
- ★ UN call for sustainable development in things
- ★ Is it lower cost, or higher quality,
- ★ Make it easy and fun to spend more time with family
- ★ A fun, interactive, and user-friendly widget-based app that can show you a snippet of someone's daily life just by looking at a home screen
- ★ *"It's like giving someone a digital hug everyday"*
- ★ *A low cost, high-quality app that reinvents family and social connections with interactive, modern features for a fresh, engaging experience*

Our Competition

Viber, messenger, life 360, Line, [The Best Family Organizer Apps of 2024 - BestApp.com](#)

Line

- has link to a sticker/gif extension where they store most stickers of characters
- Click on one and gives you more similar options and backgrounds to match it
- Line has poll function and calendar

Locket

- Locket is a widget that shows live photos from your best friends, right to your Home Screen. You and your best friends will see new pictures from each other every time you unlock your phone. It's a little glimpse of what everyone's up to throughout the day.

HOW IT WORKS

- 1. Add the Locket widget to your Home Screen
- 2. When friends sends you a photo, it instantly appears on your Locket widget!
- 3. To share a pic back, tap into the widget, take a pic with the camera, and then hit send! It appears right on your friends' Home Screens

FOR YOUR CLOSE FRIENDS

- To keep things friendly, you can only have 20 friends on the app.
- On Locket, there's no worrying about follower count, just add your best friends and family and live in the moment.
- • With Locket, you're able to be real and share photos to the people that matter.

REACT TO FRIENDS' PHOTOS

- Send a Locket reaction to your friends to let them know you saw their image.
- They'll get a notification and you'll love watching the emojis rain down on your photo.
- We don't count or track reactions publicly, so you can be real and authentic without worrying about likes and filters of other platforms.

BUILD A HISTORY OF YOUR LOCKETS

- As you and friends snap Lockets, you'll build up a history of all images sent.
- Share them out as photos or use our video recap feature to stitch together the memories of you and your friends, capturing those "love it" moments.

- Download the free app! We're keeping Locket free so you can send photos to the people that matter (friends, family, bestie, etc.). With Locket, your phone will feel like it's bringing you closer to your best friends.

BeReal

- "Your daily dose of real life" using a dual camera
- Meaningful connections

- Spontaneous moments
- Authentic real life
 - Attempts to prevent you from feeling disconnected from reality caused by exposure to idealised versions of other or the "perfect" life like IG
- Everyday get a notification to share a genuine glimpse into your real life with the people you care most about
- Be impermanence and brevity
- Reacts to ppl's photos by taking a photo

- Hey there! Welcome to BeReal, the app designed to bring authenticity back to social media. Imagine this: you're at your favorite coffee shop, the aroma of freshly brewed coffee fills the air, and you capture that perfect moment with your friends, no filters, no pretenses, just pure, unfiltered life. That's what BeReal is all about. ****React with RealMojis****

- Why settle for regular emojis when you can have RealMojis? Create your own personalized reactions and respond to your friend's BeReals in a way that's uniquely you. It's all about sharing your true feelings and making every interaction special.

- ****Explore with the Map****

- **### The BeReal Experience**

- ****Meet the Camera****

- Picture this – you're out with friends, laughing, and the sun is setting just right. With BeReal's special camera, you can capture both a selfie and a frontal photo simultaneously. It's like inviting your friends to see the world through your eyes and theirs. No more hiding behind the camera; it's time to shine in the moment together.

- ****Discover and Share****

- Ever wondered what your friends are doing right now? With BeReal, you don't have to guess. Share your daily moments publicly and dive into the lives of others around you. It's like flipping through the pages of a real-life storybook, one photo at a time. Share your adventures, your quiet moments, and everything in between.

- ****Embrace the Challenges****

- Every day is an adventure with BeReal's unique challenges. Imagine waking up to a fun prompt that makes your day more exciting. It's all about connecting with friends in new and adventurous ways. Capture these moments, conquer the challenges, and create memories that you'll cherish forever.

- ****Comment and Connect****

- Remember the last time you saw a friend's post and just had to say something? BeReal lets you do just that. Drop a comment on your friend's BeReal and spark a conversation. It's like a mini party in the comments section where everyone's invited. Connect, laugh, and make your friendships stronger.

Ever been curious about where your friends are hanging out? BeReal's map feature lets you see their location when they post. It's like a GPS for your friendship. Watch their stories unfold in real-time and feel connected no matter the distance.

- ****Relive the Memories****

- Think of BeReal as your personal time capsule. Every photo, every video, every moment is saved in your archive. Relive your favorite memories, watch your friendships grow, and connect with your past. It's your life's story, beautifully preserved.

- **### Why Choose BeReal?**

- Because life is short, and moments are fleeting. BeReal is about capturing the real you and sharing it with friends who matter. It's about connecting in genuine, heartfelt ways. It's about creating stories that are short, sweet, and unforgettable.

- So, what are you waiting for? Grab your phone, open BeReal, and start sharing your life with your friends. Whether it's a quick snap or a short video, every moment counts. Connect, share, and make every moment with your friends special.

- Join BeReal today and let's make memories that last a lifetime. Because in the end, it's the real moments with real friends that make life worth living. Share your life, capture the moments, and enjoy the friendship.

		- Stay real, stay connected!
The Problem		Like myself, most people also don't get to spend enough time with their loved ones with the average American spending less than a single hour of quality time each day with their families and friends. This lack of meaningful interaction has significant consequences to not only relationships but people's health as well. According to the American Psychiatric association, one in three Americans reports feeling lonely every week . The effects of this social disconnection are not just emotional but also physical as loneliness and reduced social interaction are linked to poor mental and physical health outcomes, including depression, anxiety, heart disease, stroke, and even dementia. So one of the solutions they looked into to combat loneliness is the use of social media. They found that 75% of the 2,000 people surveyed liked using social media to help them connect with others more frequently. Therefore, I wanted to create an app that would allow me and many others to connect more with our family and friends while also making it a convenient and fun experience
App Features		
Key feature: 1. Real-time shared memories widget: Friends can upload photos at a designated time of the day onto a customized widget that will directly show up on everyone's phone. They can also add messages to the pictures a. Add a caption		

- b. Respond through the link back to app
- c. Stickers
 - i. Play games to earn money for stickers??
- d. Notification
- e. Option to put in recurring times for the widget
- f. Will save all of the images sent to you through the widget so you have the option to save it into your photo album or watch the video recap of it that is automatically made on a special day that you pick
 - i. This option will automatically show up for you on your widget
- g. Will restrict any inappropriate photos
- 2. **Group chat:** What is a friend app without a group chat? A new group chat can be made whenever a group of more than two people is created. It gives the option to share gifs, stickers, links, photos, videos, and stickers of each other
- 3. Interactive daily questions: start every day with a fun question created by your friends or using one of our prompts.
 - a. Add photos as background photo
- 4. **Shared calendar and notification widget:** A shared calendar will be available on the app for everyone to put in their availability and important dates. This feature comes with a widget reminder that just needs to be added to the home screen, and you will get reminders of when something happens!
 - a. Calendar from gc
- 5. Group polls widget: Another widget that can be added onto the home screen where you can create and display polls for everyone to vote on
- 6. Expense splitting and tracker: simple and user-friendly expense splitting and tracker function
- 7. Steps tracking: a widget that displays everyone's steps for that day!
 - a. The more steps you have, the more stickers you can collect!
- 8. Customizable family games on the widget or in the group chats
- 9. Advanced planning tools
 - a. Gift registries
 - b. Interactive maps
 - c. RSVP tracking
 - d. Traveling templates
 - e. AI event suggestions
- 10.

Present features

- ★ Member details (contact info)
- ★ Can turn different calendars on and off
- ★ Data safety
- ★ Shared to do list
- ★ Mock up of business plan
- ★ Claude
- ★ Sigma
- ★ Updates feed
- ★ And have it all in one pag
- ★ Combine notion and cozi
- ★ Holiday planner templates

Future features

- ★ Location tracker
- ★ Original and old ppl mode
 - Different UI layers

Our Goal

- "According to wbur, loneliness and social isolation carry the same health risk as smoking 15 cigarettes a day, according to experts who say loneliness is at its highest rate in two years
 - Valuing success and wealth at the expense of our social connections?
 - Our society has increase opportunities to stream all entertainment online, working remotely, and home delivers, that may actually be reinforcing our isolation
 - Have you been in situations where you have to waste time to use four different apps to talk to the same person because each of their functions are different?
 -
 - Authenticity, privacy, interactivity, and convenience
 - Simplifying communication for families and friends
 - Enhancing and strengthening authentic connections especially in long-distance relationship
 - Reducing screen time without losing connection
 - An affordable, highly interactive, and modernized version of BeReal designed to help families and close networks stay connected in real time.
 - turn moments into memories with one click
 - Cuter interface
-

Pitch

"We say we'll call, we say we'll text, we say we'll 'catch up soon'—but let's be honest, life gets in the way. What if staying close was effortless?"

"If family and friends are what matter most, why do we spend more time scrolling past strangers than staying connected with them?"

"We track our steps, our sleep, even our screen time—but what about the time we spend with the people who matter most?"

"Think about the last time you promised to 'catch up soon.' How many weeks—or months—ago was that?"

"Your parents won't always be around to pick up the phone. Your best friend won't always be just a drive away."

How many moments are you letting slip by?"

"You wouldn't ignore a text from your boss, so why is it so easy to leave messages from loved ones on read?"

Deep down inside, we all know that our parents won't always be around to pick up the phone. Our best friend won't always be just a drive away. S

Deep down inside, we all know that our parents won't always be around to pick up the phone. Our best friend won't always be just a drive away. So why do we let so many opportunities to connect slip by? If we all say that families and friends are what we value most, why does the average American spend less than an hour of quality time with their loved ones everyday – yet more than double that time is spent on social media?

Hi my name is Ying, and like many of us, I've struggled to spend enough meaningful time with my loved ones. That's why I created Clique- an all in-one social wellness app designed to help you spend less time scrolling and more time connecting in an fun, authentic, and interactive way.

Instead of juggling multiple apps for texting, photo sharing, and event planning—only to get lost in **mindless doom-scrolling**—**Clique** simplifies everything into one place, so connecting doesn't feel like a job. For example, you can

Stay present with a live photo widget that lets you instantly share and see photos from your circles to remind you that they are always there, no matter the distance

You can also plan effortlessly with shared calendars, polls, and reminders that are built right into your group chats and is available as home screen widgets

Unlike other social networking platforms that focuses on likes, advertisements, and doomscrolling, Clique is about what matters - real connections and meaningful memories, whether that's online or in person So don't wait to connect, join clique with just a click of a button today!

We all know deep down inside that our parents won't always be around to pick up the phone. Our best friend won't always be just a drive away. So why do we let so many opportunities to connect slip by? If we all say that families and friends are what we value most, why does the average american spend less than an hour of quality time with their loved ones everyday and more than double of that time on social media?

Hi, my name is, and like many of us, I struggle to spend enough meaningful time with my family and friends. That's why I created Clique - an all-in-one social networking app designed to strengthen authentic connections in a fun, simple, and interactive way. Instead of texting in one app, sharing photos in another, and planning events somewhere else - only to get distracted and sucked into doom-scrolling, - Clique simplifies it all, so connecting shouldn't feel like a chore. With features like a live photo sharing widget, you can instantly share and see authentic moments with your circe, and it acts as a daily reminder that they are always there, no matter the distance. Our customizable group chats features a shared calendar along with a poll and reminder tab, that's also all available as home screen widgets so you can plan your next hang out or family gathering all in one place.

Unlike other social media platforms that prioritize likes, followers, and doomscrolling, Clique is about what

actually matters - real connections and meaningful memories, whether that's online or in person

So don't wait to connect, join clique with just a click of a button today!

Life is short, time is ticking, don't wait to connect. Join Clique with just a click of a button!

Hello, everyone. I'm Ying, a senior e-scholar student at the University of Portland, and I'm here to talk to you about my new social networking app.

When asked what's the three most important thing in your life: one is most likely family and friends

So As a senior, I have realized that graduation is a bittersweet time for all of us. On the one hand, we are excited to leave behind our weekly all-nighters and endless loads of homework. Still, on the other hand, it's also a time when we say goodbye to the friends who have pulled those all-nighters with us and our family who have supported us our whole life so that we can embark on a new journey. Even though we promise to call every day, to share those little updates that keep us close, we all know it's harder said than done.

That's why I am excited to tell you about Click, an app that can bring your favorite people closer than ever.

This fun and interactive widget-based app is designed for your family and friend groups to share real-time photos of their day. Whether it's a snap of them waking up or a funny selfie, it will show up directly on your home screen as a cute widget that you can customize.

It's like a daily reminder that your circle is right there with you no matter how far away you guys are. Now you may wonder how this app is different than other social media apps like BeReal, and you're right, all of these apps capture memories.

But beyond that, Click is about making it easy to create new memories. Instead of having iMessage inbox to text, a shared google calendar to plan events, and BeReal to send photos to the same people, why not do it all in one place?

So with Clique, it features a user-friendly and customizable group chat where you can, text, call, facetime, create polls, and share cool photos, vidoes memes and much more. Each group chat also has a shared calendar and reminders tab, all of which can be displayed as widgets on your home screen.

With how busy we are in this day and age, this may be the perfect app to help you connect with your loved ones whether that is on your home screen or in person – so you'll never have to be that one person who doesn't know what is happening at the family reunion.

Now, I invite you to join me on this new experience with just a click of a button to download and bring your family and friends closer than ever.

- ★ Make it shorter
- ★ Describe your problem first then introduce yourself later
- ★ What people don't like about it
- ★ Talk a lot less fast
- ★ Problem first
- ★ Introduce yourself short
- ★ What you offer
- ★ Speak slower
- ★ Short call to action

Feedback

- ★ make it simpler especially for ur user group
- ★ Get more validation from ppl on which feature is better
- ★ The more you practice the better, and just remember to enjoy sharing what u have
- ★ Come back stronger and better
- ★ Get your numbers straight
- ★ Too much info in a short amt of time, try to brand the main thing
- ★ Keep it simple
- ★ MVP (minimal viable product): Working prototype
- ★ Clarify that this is an engagement app
- ★ Cozi
- ★ If you want their subscription you have to make it clear what they get out of it
- ★ **Feedback: make it simpler especially for ur user group**
- ★ **Get more validation from ppl on which feature is better**
- ★ **The more you practice the better, and just remember to enjoy sharing what u have**
- ★ **Come back stronger and better**
- ★ **Get your numbers straight**
- ★ **Too much info in a short amt of time, try to brand the main thing**

Target Market

- ★ family oriented, young adults with jobs, women?,
 - ★ family -oriented and would like to stay connected with their aging parents, family members, or children who live far away
 - ★ At this age they are also comfortable with modern apps and we will offer a more user-friendly mode for those who need it
 - ★ lastly they will be more financially stable, making them more willing to pay for this app
-

Marketing Strategies

- ★ Huge growing business targeting families (targeting them)
- ★ Show good real life examples of how impactful ur marketing strategy is
- ★ Community marketing
 - ★ - Sponsor social media creators and small influencers to advertise app once we gain some traction or have the money to do so
- ★ - obtain reviews and ask users to share their experience using our app on social media
- ★ - Digital marketing
 - ★ - advertise on popular websites and social media apps
- ★ - lastly we have Referral Program where
 - ★ - users who invite four or more of their family or friends to download Clique can get a discount on their subscription
- ★ - Partnerships and Collaborations
 - ★ - provide discounts to organizations (like hospitals), family oriented business, or apps that align with my target audience
 - BeReal spread widely due to a paid ambassador program

Revenue Model

- ★ Subscription tiers
 - Ads
 - Post family related ads like sponsored challenges
 - Share your funniest vacation photo
 - Subscription Tiers
 - Clique Starter: \$25 per year
 - Clique Pro: \$30 per year
 - Group Clique Pro: \$22.5 per year (
 - Shared family account)
 - One time buy
 - Affiliate partnerships and integrated services
 - Collaborate with other businesses to put their services on your app and charge a transaction fee
 - Like if people bought tickets through a ticket master link on your app
 - Family travel packages, photo book printing, family games
 -
- ★ See what they are willing to pay for this app
- ★ Set a price and see how many buy it
- ★ If you do paid advertisements, your product has to already work well
- ★ Family memberships (incentive to yearly)

- ★ Free trial
- ★ Seasonality

Presentation

Introduction

Hello Everyone, my name is Ying and I am here to present my new social networking app Clique, which can help you turn moments into memories with one click

- Play a game of never have I ever
 - With how fast you lost the game, can show how little time you have spent with your family and friends and just think about how that makes you feel
 - Many of you might say not good and that is true, there are some many people out here who can't
- A show of hands how many

#2 The problem

To start I want to talk about the inspiration for creating this app that came from my applying to graduation, where it hit me that in less than a year I wouldn't have the privilege to see my friends every day or my family if I ended up moving for my job.

And I am sure that I am not the only one who feels that connecting with our loved ones can be more difficult as we grow older and become busier

Like myself, most people also don't get to spend enough time with their loved ones with the average American spending less than a single hour of quality time each day with their families and friends.

This lack of meaningful interaction has significant consequences to not only relationships but people's health as well.

According to the American Psychiatric association, one in three Americans reports feeling lonely every week, which can be linked to poor mental and physical health outcomes, including depression, anxiety, heart disease, stroke, and even dementia.

So one of the solutions they looked into to combat loneliness is the use of social media. They found that 75% of the 2,000 people they surveyed liked using social media to help them connect with others more frequently.

Therefore, I wanted to create an app that would allow me and many others to connect more with our family and friends while also making it a convenient and fun experience

#3 Solution

That's when Clique came about: it's a fun, interactive, and user-friendly widget based app that can show a snippet of someone's daily life just by looking at a home screen

It's almost like giving someone a digital hug every day

So now you may wonder how is this different than other social media apps out there? And it's because of the unique features it offers

#4 Features

so One of its key features includes:

1. a group chat because what kind of social app doesn't have a group chat right
 - as you can see in this demo that it's like any normal group chat where you can
 - call, text, facetime, share links, videos, and photos
 - but it will also have a shared calendar for everyone to put in their availability
 - individualized or shared to-do list
 - poll creating tab where you can vote for certain ideas
 - and there's a place to see all of your upcoming events that can be connected to a widget so it's added to your home screen as a reminder
- lastly you can have unlimited amount of group chats to customize with fun digital stickers, prints, and images
2. Another feature is their live photo sharing
 - click on the widget
 - Upload a picture at a designated time of day and it will show up on everyone's phones who are in that group chat
 - so for every group chat you have, you get the option to add a widget that shows photos posted by people in that chat
3. the other feature offered is a steps tracker
 - if you meet a certain amount of steps every day consecutively for a certain amount of time you can unlock more features such as: widget frames, stickers, and the ability to send short videos instead of pictures on your widget

#5 Target Market

This app can be used by anyone with a smartphone as it is free to download

- however, the target market we would be focusing are middle aged adults because as shown through this screenshot, they are very close to being the leading social network users in the US
- other factors that were taken into consideration was that they have reached a stage of being family -oriented and would like to stay connected with their aging parents, family members, or children who live far away
- At this age they are also comfortable with modern apps and we will offer a more user-friendly mode for those who need it

#6 Competition

Now as we go into the competitive analysis, you guys may already know that social networking is an enormous market

My competitors focuses on either real-time photo sharing with all of their friends, organization of family events or like traditional social media app that allow you to make connections with a large community of people

- And my Competitive edge to them is that we are an All-in-one platform that goes beyond sharing pictures but has practical features to help coordinate and plan in-person hangouts and events so our connections can come to life

Additionally, Clique focuses on our close circle, the people we want to spend the most time with rather than connecting with a larger community

#7 project timeline

Now in terms of what we are expecting to accomplish in the next few years, you can see that we will be conducting....

#8 Market strategy

- as shown in timeline, we will focus a lot on marketing the first year so some strategies we are looking into is Community marketing

- Sponsor social media creators and small influencers to advertise app once we gain some traction or have the money to do so
- obtain reviews and ask users to share their experience using our app on social media

- Digital marketing

- advertise on popular websites and social media apps

- lastly we have Referral Program where

- users who invite four or more of their family or friends to download Clique can get a discount on their subscription

#9 Revenue model

our app is free to use so we have to generate revenue through Ads and subscriptions

- for subscriptions we will have different tiers to them starting with the clique starter for \$25 per year and then clique pro which is \$30 per year to unlock all features and remove all ads
- lastly is the discounted subscription mentioned earlier where 4 or more people who use the same referral code to buy the subscription can get a 25% discount on it

#10 financial projections

this is my projected total revenue for the next four years

- the first year, I won't include ads because I want to make focus on building a strong consumer base first
- because of this you will notice a larger growth from the first to second year of 300%
- both the third and fourth year there will be a expected growth of 200%

Risk analysis

- Highly competitive market

- Technical issues with the app
- Insufficient revenue generation

#11 Team

Now that we are done going through information about the business, let's talk about the team, so Clique has two co-founders which is myself and my partner, Ariella. A little bit about myself, I am a senior nursing major with strong a interest in entrepreneurship so I mainly focus on the business planning, marketing, sales, and data analyzing part of the business. Ariella is a computer science major, who does most of the product designing and developing.

#12 Investment Request

And finally, I just have one favor, which is to get an investment in our company so we can build a minimally viable product

We are asking for xxxx

That's it thank you so much for listening

Meetings (check phone bill policy for Chile!)

Dear,

My name is Ying Zhen, and I am a student at the University of Portland, Catholic in the United States of America. I am currently part of an entrepreneurship program, where I am building a social networking app to help families and friends stay connected and create gatherings. As part of this program, I will be in Santiago from March 2nd to March 5th to have informational interviews with professionals who can offer insight into my idea or provide any business advice in general. I would appreciate having a brief meeting with you to learn about your experience in building a business based on an app/ the app development process/ viability of my venture in Argentina/ Chile, as it will be invaluable to help me refine my idea. Please let me know if you will be available during those dates, and I'll gladly accommodate your schedule. I look forward to hearing from you.

- How your culture has impacted the development of ur app
- Cultural insights
- Download whatsapp

Thank you for your time and consideration!

Ying

Dear University of Valparaiso's Engineering Faculties,

I hope this message finds you well. My name is Ying Zhen, and I am a student in a entrepreneurship program at the University of Portland in the United States. As a part of this program, I will be going on a business trip to Santiago from March 2nd through the morning of March 5th and in Valparaiso from March 6th to March 7th. During this trip, I will have informational interviews with professionals who can offer insight into my business idea. My venture focuses an all-in-one social networking app and I am eager to connect with professionals in the fields of computer science and digital technology to better understand the operations behind app development.

Given the University of Valparaiso's strong reputation in computer science and engineering, I was hoping to briefly talk with a faculty member from your School of Computer Engineering to discuss my venture, gather feedback, and/or learn more about the technological landscape in Chile through a brief meeting. Please let me know if there is a faculty member who might be open to this, or if you could direct me to the appropriate contact. Thank you in advance for considering my request. I look forward to the possibility of learning from your esteemed school.

Warm regards, Ying

Solicitud de Entrevista Informativa

Estimadas Facultades de Ingeniería de la Universidad de Valparaíso,

Espero que este mensaje les encuentre bien. Mi nombre es Ying Zhen y soy estudiante del Programa de Emprendimiento en la Universidad de Portland, Estados Unidos. Como parte de este programa, realizaré un viaje de negocios a Santiago del 2 de marzo hasta la mañana del 5 de marzo, y estaré en Valparaíso del 6 al 7 de marzo.

Durante este viaje, tendré entrevistas informativas con profesionales que puedan ofrecer perspectivas valiosas sobre mi idea de negocio. Mi proyecto se centra en el desarrollo de una aplicación de red social todo-en-uno, y estoy interesada en conectar con profesionales en los campos de la informática y la tecnología digital para comprender mejor las operaciones detrás del desarrollo de aplicaciones.

Dada la sólida reputación de la Universidad de Valparaíso en ciencias de la computación e ingeniería, me gustaría tener la oportunidad de conversar brevemente con un/a docente de su Escuela de Ingeniería Informática para discutir mi proyecto, recibir retroalimentación y/o conocer más sobre el panorama tecnológico en Chile. Agradecería si pudieran indicarme si hay algún/a docente dispuesto/a a reunirse conmigo o si podrían derivarme a la persona de contacto adecuada.

Agradezco de antemano su consideración y espero con interés la posibilidad de aprender de su prestigiosa institución.

Atentamente,
Ying Zhen

Dear ,

I hope this message finds you well. My name is Ying Zhen, and I am a business student in an entrepreneurship program at the University of Portland in the United States. As an aspiring entrepreneur, I am currently focused on a venture idea about building an all-in-one social networking app designed for families, and close networks to connect online and in-person easily. Through the program, I will go on a business trip to Santiago from March 2nd through the morning of March 5th and to Valparaiso from March 6th to March 7th to obtain insight into my venture idea and learn more about what international business is about. Therefore, I would love to connect with someone in your department to better understand how business is conducted in Chile, the challenges and opportunities in the local market for apps, and any advice you might have for someone looking to become an entrepreneur or businessman.

Given the University of Chile's strong reputation in business and economics, I would be incredibly grateful for the opportunity to conduct a brief information interview with a member of this department and learn from their expertise. Please let me know if there's any additional information I can provide to facilitate this process. Thank you in advance for considering my request. I look forward to the possibility of learning from your esteemed school.

Warm regards

Dear ,

I hope this message finds you well. My name is XXX, and I am a business student in an entrepreneurship program at the University of Portland in the United States. As an aspiring entrepreneur, I am currently focused on a venture idea about building an all-in-one social networking app designed for families, and close networks

to connect online and in-person easily. Through the program, I will go on a business trip to Santiago from March 2nd through the morning of March 5th and to Valparaiso from March 6th to March 7th to obtain insight into my venture idea and learn more about what international business is about. Therefore, I would love to connect with you to better understand what your role is about and your path to get into this role. Additionally, I would like to know about how digital marketing is conducted differently in Chile compared to the US, the different digital strategies available for marketing an app, and any advice you might have for my venture idea or just someone looking to build a business.

Given Cebra's strong reputation in international business and its achievements, I would be incredibly grateful for the opportunity to conduct a brief information interview with you and learn from your expertise. Please let me know if I can provide any additional information to facilitate this process. Thank you in advance for considering my request. I look forward to the possibility of learning from your esteemed school.

Atentamente,
Ying Zhen

Estimadas Facultades de Ciencias Empresariales de la Universidad de Chile,

Espero que este mensaje les encuentre bien. Mi nombre es Ying Zhen, y soy un estudiante de negocios en un programa de emprendimiento en la Universidad de Portland en los Estados Unidos. Como aspirante a empresaria, actualmente estoy centrada en una idea de empresa sobre la creación de una aplicación de red social todo en uno. A través del programa, voy a ir en un viaje de negocios a Santiago del 2 de marzo hasta la mañana del 5 de marzo y a Valparaíso del 6 de marzo al 7 de marzo para obtener información sobre mi idea de empresa y aprender más acerca de lo que los negocios internacionales se trata. Por lo tanto, me encantaría conectarme con alguien de su departamento para entender mejor cómo se llevan a cabo los negocios en Chile, los desafíos y oportunidades en el mercado local para las aplicaciones, y cualquier consejo que pueda tener para alguien que busca convertirse en un empresario o emprendedor.

Dada la sólida reputación de la Universidad de Chile en negocios y economía, estaría increíblemente agradecido por la oportunidad de realizar una breve entrevista informativa con un miembro de este departamento y aprender de su experiencia. Por favor, hágame saber si hay alguna información adicional que pueda proporcionar para facilitar este proceso. Gracias de antemano por considerar mi solicitud. Espero con interés la posibilidad de aprender de su estimada escuela.

Reciba un cordial saludo,

I am reaching out because I have a deep interest in understanding the business landscape in Chile and would greatly value your expertise and insights.

I am currently exploring [briefly describe your venture idea or project, e.g., "a venture idea focused on sustainable tourism in South America"] and would love to learn more about how business is conducted in Chile, the challenges and opportunities in the local market, and any advice you might have for someone looking to enter this space.

Given your extensive experience and knowledge in the field, I would be incredibly grateful for the opportunity to conduct an informational interview with you or a member of your team. I am particularly interested in learning about:

1. The key factors that contribute to successful business ventures in Chile.
2. Common challenges faced by entrepreneurs or businesses in the region.
3. Any feedback or suggestions you might have regarding my venture idea.

I am happy to accommodate your schedule and can meet virtually or in person, whichever is most convenient for you. The conversation would take no more than 20–30 minutes of your time.

Thank you for considering my request. I truly admire the work being done by [University Name]'s Business Department and would be honored to learn from your expertise. Please let me know if there's any additional information I can provide to facilitate this process.

Looking forward to your response.

Best regards,

I would appreciate meeting with someone on your team to learn about their experience in mobile app development and understand the viability of my venture in Chile, as it will be invaluable to help me refine my idea. Please let me know if you will be available during those dates, and I'll gladly accommodate your schedule. I look forward to hearing from you.

Thank you for your time and consideration!

Ying

My name is Ying Zhen, and I am a student at the University of Portland in the United States of America. I am currently part of an entrepreneurship program, that allows us to create our venture idea and further explore it through the program. My venture idea is related to building a fun social networking app to help families and friends stay connected. As part of this program, I will be in Santiago from March 3rd through the morning of March 5th and in Valparaiso from March 6th to March 7th to have brief informational interviews with professionals or start-up organizations who can offer insight into my idea, or provide any business advice in general. If this is not possible, talking to mobile app developers or just any small business owners or locals to learn about how their culture and lifestyle will impact the viability of my app in Chile is fine as well! Please let me know if you will be available during those dates, and I'll gladly accommodate your schedule. I look forward to hearing from you.

Hello,

I hope you are doing well! My name is Ying, and I am one of the E-Scholars from UP who met you when you visited our class in November. I really appreciated your insights during that session and volunteering to be a mentor for our class!

Therefore, I wanted to reach out for your support related to connecting me with people for our international business trip. As you may know, we attend this trip over spring break every year and this year's destination is Santiago and Valparaiso, Chile. For this trip, I'm looking to connect with individuals or organizations who could offer insights to new entrepreneurs like myself or for my venture idea. I'm currently developing an all-in-one social networking app designed to help families and close networks stay connected. Hence, I'd love to specifically connect with people experienced in app development, digital marketing, UX design, and financial management, or just locals familiar with Chile's social media market.

Given your wide network, I was wondering if you might know anyone in Chile, or could refer me to someone who does. Regardless, any connections or advice you offer would mean a lot. I am also happy to offer more information about my venture idea if you need it.

Thank you for your time and support. I look forward to hearing from you!

Ying

[Social media usage in Chile - statistics & facts | Statista](#)

Santiago, Chile		Valaprios	
Exadel	Software development company - Contacted through Behemoths -	Facebook groups	
Startup Chile	600 586 8000 Couldn't send message to them so call		

Paxzu (PAXZU Company Profile - TechBehemoths)	Well known advertising company but does do app development too - chile@paxzu.cl(56) 9 2079 4991Av. Apoquindo 2930, Piso 2, Las Condes, Santiago de Chile

Chile's culture

- Business
 - More conservative
 - Business is more professional
 - Not really punctual, really go with the flow
 - Dress business formal
 - Tell them what you seen and what you like
 - Tell them how excited you are here to be here
 - Less likely for start ups to survive there bc of the small population and less spending power
- Culture
 - Very proud of their country
 - Warm and friendly
 - Lots of immigrant labors there that are haitian and speak french

- Lots of prejudice against bolivians and peruvians
- There is a inferiority complex
- Won't get server helped and doesn't really focus on customer service
- No line —> just blobs
- Don't be loud
- Pickpockets is common
- Try not to speak English as much
- Don't freaking bowwww
- Water is usually pretty safe
- Produce is pretty safe to buy
- Family is important
 - Always very close to family
 - Wouldn't want to miss family events like a birthday
- Map
 - Santiago has 37 districts
 - Developed
 - All houses are gated so have to yell over it to get in
 - Metro is good
 - Don't try the buses
- important words
 - Have a lot of words themselves
 - hey i'm here (yell aloé)
 - gringo (white people)
 - chino (chinese)
 - to say hello (one kiss on the right for female)
 - don't shake hands with business people
 - districts (comunas)
 - Straw (bombilla)
 - How are you (Como estaíee)
 - Toilet paper (confort)
 - Thank you (por favor)
 - Thanks (porfa)
 - Tea (tei)
 - Bebida (soda)
 - leaving a store (gracias)
- Places to go
 - Mueso de la museum (museum of the lost people)
 - La vega central de santiago (produce market)
- Weather
 - Less air pollution at that time
 - Just started going back to school
- Currency

- Do mainly use chips
- Food
 - Cazuela
 - Vegetable soup
 - Completos
 - Most unique chilean street food
 - A hot dog but different toppings
 - Parrilladas
 - Mountain of meat
 - Salad
 - One type of vegetable
 - No dressing just vinaigrette, salt, oil, peper, lemon

Business Plan

5 things to think about to start a real business

1. Be very clear about how you will make money (i.e. what are people going to pay for your product or service and what will it cost to deliver it?)
2. Get to market as quickly and as cheaply as you can (this will reduce the amount of capital and time you put at risk if the venture isn't successful and accelerate learning)
3. Develop and use your network (a network can be an excellent source of feedback on your idea, of resources and professional services, and can give you credibility with others, etc)
4. "Cash is king" -- remember that a profitable company can run out of cash so put together cash flow projections and pay attention to actual cash flows versus your projections. It is almost always the case that cash outflows are underestimated and cash inflows are overestimated.
5. Take the time to write up a brief business plan. This doesn't have to be a long, highly detailed document (no more than 5 pages of text) but it should clearly communicate to anyone reading it what product or service your business offers (non-text material like figures, flow charts, graphics, photos can be very helpful), who your customers are and how you reach them and why they will buy, how you will make money, and what resources you need when (based on your cash flow projection).
6. Have solid relationships and clear understandings of each partner's expectations about what will be put in to the business (e.g. time and money) and what will be taken out (salaries, dividends and exit strategies) and what happens if one or more partners leave
- 7.

Principles for Business Success:

1. Have passion for what you do
2. Enjoy what you are doing – and do enough of it so you feel some stress
3. Work hard and be responsive
4. Find good partners and be a good partner
5. Move fast and learn
6. Be honest
7. Be generous

Goal: What your business is all about and why it will be successful

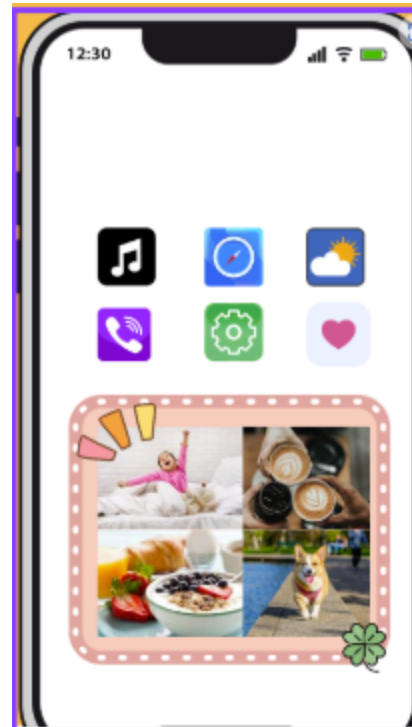

- It also should become a vehicle for you to solicit input on your new venture from others and to incorporate the good suggestions you get back.
- a picture is worth a thousand words. In other words, include pictures, charts, tables, graphs, illustrations, business model canvas, etc. in your business plan.

1. Cover page and table of contents

2. Executive Summary

3. Description of Business

- Describe your business idea. What type of business is it? What are the products or services? What is the pain you are relieving or value you are providing?
- My business idea is to create an inclusive social networking app for families and friends to stay connected easily on a regular basis. This app will focus on being interactive, entertaining, and offer a new and engaging experience for all users so they can not only see a glimpse of their family and friend's lives but also allow plans to make it out of groupchats with its planning features. It can be described as an n affordable, highly interactive, and modernized version of BeReal designed for your loved ones and you to strengthen your connections.
- The services provided in this app is a real-time photo sharing widget that can allow people to see pictures just on your home screen. Additionally, it will have group chats to call, video chat, share information and a shared calendar, so planning can be easy.
- There are several values that this app provides. The first one being that it can be really hard to stay connected when we don't have opportunities to see our loved ones everyday. Despite having modern technology that allows us to connect quickly even when we are across the world with a simple call or Facetime, we still find it difficult to make time to update each other and talk regularly. Therefore, I want to find a quick, fun and interactive way for people to update each other on their daily lives to strengthen authentic connections, as well as giving opportunities to build real life memories that will be remembered forever.

4. Customers, marketing and distribution

- Who are your customers and how are you going to reach them? How do you know your customers will want your products or services?
- My customers are families and close networks that are long-distant or like to communicate with each other every day. I am aiming mainly for young adults who are already working and can hear about this app through social media marketing and introduce it to their family members and friends
- Of the 40 people that I have surveyed, most people agreed on the fact that they disliked social networking apps used in the past because of their lack of features, which means there is a trend of people looking for a more inclusive social app. As we can see from the success of BeReal who focus on authenticity, people are looking for more real connections. Additionally, if users are needing to pay subscriptions for apps that they only use one feature for, why not pay one subscription for features that you will all use. Aside from market research, I will do more surveying of different age groups and test the market with a MVP.

5. Business Model

- My business model is Freemium, which means they are able to use the free version, but users can pay a subscription for no ads and to activate more features. Users will also have a two month free trial before the subscription begins and if they are unsatisfied, money will be returned to them. You can see the subscription tiers below.
- Ads
- Subscription Tiers
 - Clique Starter: \$25 per year
 - Clique Pro: \$30 per year

- iii. Group Clique Pro: \$22.5 per year
 - 1. Shared family account

6. Industry Background, Competitor & Market Analysis

- a. Who are the competitors in your market and what are their strengths and weaknesses? How are they likely to react to your new venture?
- b. Because I am an all-in-one app, I have many competitors that have just one of the features available in my app but a more robust versions of it. For example, BeReal has a similar and robust live photo sharing feature, which allows people to see each other's day and interact with the pictures. There is also Instagram, which is a giant social networking app that is known for their photo sharing and group chat features. I think they will start adding more features to their apps as well if they knew about my new venture. This is because they have already built a customer market that trusts them and by having more features, it will give people more reasons to use their app.

7. Competitive Advantage

- a. What is your competitive advantage and what will prevent competitors from taking business from you once you are successful? What is your intellectual property (IP) strategy if applicable?
- b. To make my idea stand out, I will try to focus on areas that these giant apps don't prioritize. For example, Instagram, Facebook, and BeReal are all broad social media platforms that focus on connecting with a wide community and network of users. However, my app focuses on building a private, meaningful and intimate connection with the ones we care about the most and will be in our lives for many years to come. Therefore, I am creating a safe and trusted space to be authentic and genuinely connect without the societal pressure to do it in a certain way.
- c. Additionally, these platforms focus on one or two main features like photo sharing, but my app offers an all-in-one experience. This reduces the need for multiple apps and offering convenience, so quality time can be spent on the people you care about instead of scrolling on social media.

8. Marketing Plan

- I will try to start marketing to a smaller community of people first that we know of first in hopes that we can spend the least amount of money and time on marketing in case the app is not successful. Then we will partner with smaller influencers with a loyal audience on social media platforms like Instagram, TikTok, and Youtube to demonstrate our unique features and competitive edge. Additionally, I will advertise on popular websites or other apps in hopes that it reaches more people. My goal is to market to enough people that they can invite more users so that the app can pay for itself.

9. Operations Plan

- a. What type of operations will you need to set up? What will be your supplier relationships?
- b. MVP Development
 - i. Create a basic layout of the app
 - ii. Design the user experience and interface
 - iii. Create a MVP

- c. Find users to test out the MVP before starting development
- d. Financial Management
 - i. Track all costs
 - ii. Find investors to invest in app
- e. Product Development
 - i. Pick the programming language to use for building the app and hire developers if needed
 - ii. Pick a reliable cloud service to host the app
 - iii. Implement strong data security and privacy measures
 - iv. Integrate third party companies like payment methods for the freemium model
 - v. Add in a help center
 - vi. Implement revenue model into app
- f. Marketing and Testing
 - i. Market the app using marketing strategies mentioned before and find users for the beta test
 - ii. Gather feedback from beta test
 - iii. Adjust app and fix any bugs
 - iv. Continue to market to a larger crowd
- g. Deploy app into the app store
- h. Gather Feedback and monitor performance post launch
 - i. Set up times for regular updates on app
- i. Scale and grow
 - i. Continue to market and advertise app and focus on building a sense community around the app
 - ii. Consider adding new features or different languages to it
 - iii. Begin adding new features

10. Management Summary

- a. Will you develop the business on your own or do you have partners or others you'll work with? What experience do you (and any partners) have that leads you to believe you'll be successful?
- b. I have a partner who is a junior computer science major and has experienced building a website before. Although she has no experience in building an app, she is currently taking classes to build skillsets that can be applied to app development and user interface design. As for myself, I am taking this entrepreneurship class right now to learn more about the business parts of my venture idea. Because I also have very little background in entrepreneurship, I have been seeking help and advice from my professor, and mentors who have experience with start-ups in hopes that I will be guided on the right track. I will also try to take more marketing, financing, app development and web design related courses in the future to be more well rounded in this field. I know that with us both being passionate about this venture idea, we can take steps to learn the hard skills to build this business, even if it requires a lot more work and time on our end because of how inexperienced we are.

11. Financial Plan

- a. Describe the resources you will need to start the business and keep it going long enough

until it can pay for itself. If you are going to ask for financial investments, then spell out the terms for potential investors (i.e. how are they going to get a return on their investment?).

12. Future Plans and Exit Strategy

- a. Communicate what you expect the business to be in the future. In one year? In five years? What is the “exit strategy?” Include financial projections (cash budget and financial statements).
 - i. In one year, the app will probably still be in development. However, in five years, I expect the business to already be launched and gain enough traction to start earning money for itself. If my app goes as planned, I would like to offer a business version of it so businesses can utilize this platform to develop a strong team.

13. Appendices with Supporting Material

- a. Can insert survey results here

App Development Instructions

1. Ideation and Planning

- **Define Your App Idea:** Identify the problem your app will solve or the value it will provide.
- **Research the Market:** Analyze competitors, target audience, and market demand.
- **Set Goals:** Define the purpose of your app (e.g., revenue generation, user engagement, etc.).
- **Create a Wireframe:** Sketch the basic layout and flow of your app.

2. Design

- **User Experience (UX) Design:** Focus on how users will interact with your app. Create user personas and user journeys.
- **User Interface (UI) Design:** Design the visual elements (colors, fonts, buttons, etc.) to ensure the app is visually appealing and intuitive.
- **Prototype:** Build a clickable prototype to test the design and flow before development.

3. Development

- **Choose a Tech Stack:** Decide on the programming languages, frameworks, and tools (e.g., React Native for cross-platform, Swift for iOS, Kotlin for Android).
- **Frontend Development:** Build the user interface and client-side functionality.
- **Backend Development:** Develop the server, database, and APIs to support your app.
- **Integrate Third-Party Services:** Add features like payment gateways, analytics, or push notifications.
- **Test the App:** Conduct unit testing, integration testing, and user testing to identify and fix bugs.

4. Deployment

- **Choose a Platform:** Decide whether your app will be on iOS, Android, or both.
- **App Store Guidelines:** Ensure your app complies with the guidelines of the Apple App Store and Google Play Store.
- **Create Developer Accounts:** Sign up for developer accounts on the respective platforms.
- **Prepare Assets:** Create app icons, screenshots, and descriptions for the app stores.
 -
- **Submit for Review:** Upload your app to the app stores and wait for approval.

5. Post-Launch

- **Monitor Performance:** Use analytics tools (e.g., Google Analytics, Firebase) to track user behavior and app performance.
- **Gather Feedback:** Collect user feedback through reviews, surveys, or in-app prompts.

- **Fix Bugs and Improve:** Regularly update your app to fix bugs and add new features.
-

6. Marketing and User Acquisition

- **Create a Website:** Build a landing page or website for your app to showcase its features and benefits.
 - **Social Media Marketing:** Promote your app on platforms like Instagram, Twitter, Facebook, and LinkedIn.
 - **App Store Optimization (ASO):** Optimize your app's title, description, and keywords to improve visibility in app stores.
 - **Run Ads:** Use paid advertising (e.g., Google Ads, Facebook Ads) to reach a wider audience.
 - **Leverage Influencers:** Partner with influencers or bloggers to promote your app.
 - **Email Marketing:** Build an email list and send updates, offers, and news about your app.
-

7. Retention and Growth

- **Engage Users:** Use push notifications, in-app messages, and personalized content to keep users engaged.
 - **Offer Incentives:** Provide rewards, discounts, or exclusive content to retain users.
 - **Build a Community:** Create forums, social media groups, or events to foster a community around your app.
 - **Analyze and Iterate:** Continuously analyze user data and feedback to improve the app and introduce new features.
-

8. Monetization (Optional)

- **Choose a Model:** Decide on a monetization strategy (e.g., freemium, subscriptions, in-app purchases, ads).
 - **Implement Payment Systems:** Integrate payment gateways like Stripe, PayPal, or Apple Pay.
 - **Optimize Revenue:** Test different pricing strategies and ad placements to maximize revenue.
-

9. Scaling

- **Optimize Performance:** Ensure your app can handle increased traffic and usage.
 - **Expand Features:** Add new features or platforms (e.g., web version, wearables).
 - **Global Reach:** Localize your app for different languages and regions.
-

10. Maintenance

- **Regular Updates:** Fix bugs, improve performance, and add new features to keep users engaged.
- **Stay Compliant:** Ensure your app complies with changing regulations (e.g., GDPR, CCPA).
- **Monitor Security:** Regularly update security measures to protect user data
