

app/

- |— home/
 - |— index.tsx ← main screen w/ swipe & nav
 - |— GroupChatScreen.tsx ← group chat list screen
 - |— SettingsSidebar.tsx ← settings overlay
 - |— UserProfileSidebar.tsx ← user profile overlay
- |— groupchat/
 - |— create.tsx ← group chat creation flow
 - |— [id].tsx ← individual group chat room
- |— memory/
 - |— index.tsx ← memory gallery (from groups)
 - |— camera.tsx ← take a memory
 - |— post.tsx ← frame selection + caption
- |— calendar/
 - |— index.tsx ← master calendar
 - |— [groupId].tsx ← group-specific calendar view

components/

- |— AnimatedTabBar.tsx ← raindrop nav
- |— MemoryWidget.tsx ← home screen memory widget
- |— FramePicker.tsx ← scrollable frame options
- |— CustomFontText.tsx ← stylized username renderer
- |— EventModal.tsx ← add/edit events
- |— StarMenu.tsx ← tools popup (poll, stickers)

assets/

- |— frames/ ← frame images (png/jpg)
- |— fonts/ ← custom fonts like handwriting

Memory Flow (Camera → Frame → Post → Display)

Files:

- `memory/camera.tsx`
- `memory/post.tsx`
- `memory/index.tsx`
- `components/FramePicker.tsx`

Goals:

- In-app camera
- Pick a frame
- Post to group
- View memory in gallery / group feed

Memory Widget on Home

Files:

- `components/MemoryWidget.tsx`
- Rendered inside `home/GroupChatScreen.tsx`

Goals:

- Displays recent memory from selected group
- Shows frame + avatars
- Optional animation and settings later

Master Calendar + Group Calendars

Files:

- `calendar/index.tsx` ← overview of all groups
- `calendar/[groupId].tsx` ← single group view
- `components/EventModal.tsx`

Goals:

- Monthly view w/ events
- Group colors or icons
- Tap → slide up event details
- Add event modal

Group Chat System

Files:

- `groupchat/create.tsx`
- `groupchat/[id].tsx`

Goals:

- Create group w/ photo
- Enter static chat layout
- Add messages
- Connect to memory & calendar

Magic Menu Button in Chat

Files:

- `components/StarMenu.tsx`

Goals:

- Tap to expand poll, doodle, stickers, etc.
- Starts with poll only
- Cute UX

Group & User Customization

Files:

- `home/UserProfileSidebar.tsx`
- `components/CustomFontText.tsx`

Goals:

- Each user sets a:
 - handwriting font for username
 - message font
- Groups have:
 - background customization
 - group photo
 - optional global themes

Chat UI Polish

Files:

- `groupchat/[id].tsx`

Goals:

- KeyboardAvoidingView fix
- Cute input bar
- Auto-scroll on new message
- Messages adapt to theme/font

User Profile Page

Files:

- `home/UserProfileSidebar.tsx`
- Add dotted avatar border
- Handwriting-style font
- Frame preview area (custom frame)
- Settings sidebar working

Files:

- `home/SettingsSidebar.tsx`
- Fix backdrop + touch nav

Prep for Firebase Integration (Later)

Files:

- Data structure docs
- Placeholder mock state for now

POLISH GOALS

- Widget animation when memory is posted
- Page transitions between memory/calendar
- Add fun sticker packs in chat
- Offline save support
